Cove Chair Assembly Instructions

NOTES

- **You will need a metal paperclip to open and close the safety zipper (remove after use)**
- **Allow filling to expand for 24-36 hours before assembly**

1. Box Contents
    - 4 x filled inner bags (vacuum-sealed in polybags)
    - 1 x outer cover.
2. Remove the inner filled bags from the polybags to release the vacuum seal.

3. Allow the inner bags to expand. For best results, wait **24-36 hours** before assembling.
4. Once the bags have substantially expanded, proceed with assembly:
5. Identify each filled bag.
    - 2 x arms
    - 1 x back
    - 1 x seat

6. Each inner filled bag is labelled “A”, “B”, “C”, or “D”. Match the inner bags to the corresponding letters inside the outer cover. These labels indicate where each piece should be inserted.

7. Start by inserting the **seat cushion** into the cover.
   Note: Ensure the zipper on the inner bag is aligned with the bottom zipper of the cover.

8. Use the Velcro to secure the seat filling firmly in place.

9. Insert the **left armrest** (with the zipper facing downward).

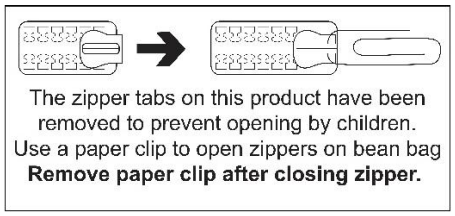

10. Insert the **right armrest** (zipper also facing downward).

11. Insert the **back cushion** into the cover, again making sure the zipper is positioned at the bottom.

12. Insert a paperclip into the safety zipper. Zip the cover completely closed, then remove the paperclip. Your Cove Chair is now ready to use.

DO NOT PLACE THIS PRODUCT NEAR AN OPEN FLAME OR RADIATOR AT ANY TIME.
